EDUCATION

University of Washington, Seattle, WA — *B.S.*

September 2015 - June 2019

Bachelors of Science Degree from the University of Washington

University of Washington Full Stack Web Development Coding Bootcamp

March 2021 - September 2021

Professional Certificate in Web Development through the University of Washington

PROJECTS

Dine N Flick — *Web Application to Find Movie Theaters and Breweries Nearby*

Our group decided on an idea using APIs to create a web application for users that were happening to be going on a date. We had to design the web application page using HTML and CSS

The-Food-Index — *Web Application to Find Food by Cuisine and Order*

This project is a MERN stack application that allows the user to find new restaurants by cuisine and order the food off the application.

SKILLS

Strong knowledge of macOs

Able to use bash commands to update GitHub repositories

Front End Web Development: HTML, CSS & JavaScript

Strong ability and understanding of objects and writing classes

Knowledge of data structures and using algorithms

Adept with Node.js and creating a server for an application to run

Great with creating schemas and creating databases in SQL and MongoDB
